- 25X1A 2. Comment. Route and destination could not be definitely identified. Presumably, return to the U.S.S.R. of empty boxes.
- 25X1A 3. Comment. Major Slensky (fnu) is reported for the first time.
4. Comment. With 198 carloads handled at the railroad station during the period from 1 to 30 September 1952, supply traffic decreased about 10 percent, as compared with supply traffic from May to July 1952.                     . There were no extraordinary traffic routes or shipments.
